U.S. Patent No. 8,671,195 v. Roche Accu-Chek Guide Meter

Exhibit 3 to the Complaint.

1. Claim Chart

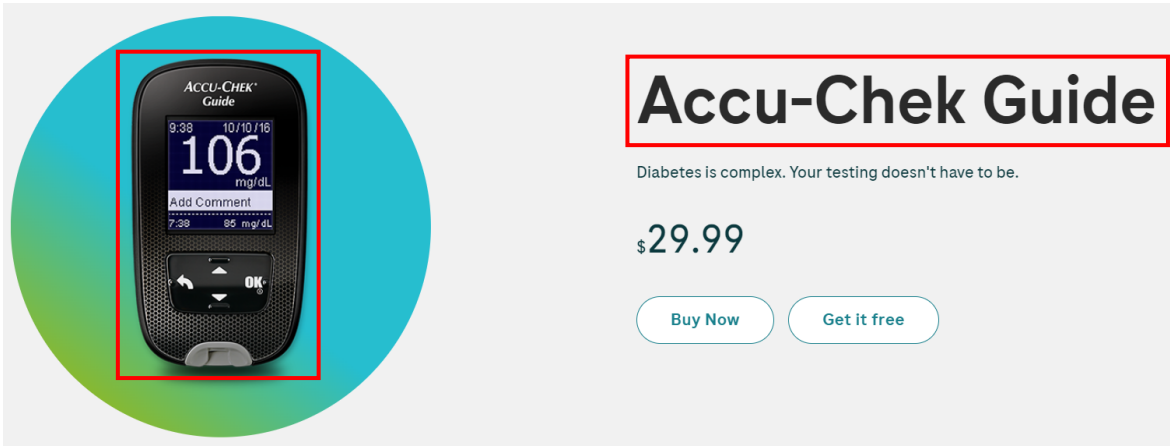

Claim	Analysis
<p>[1.P] A digital media communication protocol, comprising:</p>	<p>Roche Diagnostics Corporation ("Company") makes, uses, sells and/or offers to sell a digital media communication protocol.</p> <p>This element is infringed literally, or in the alternative, under the doctrine of equivalents.</p> <p>For example, Company provides Accu-Chek Guide, a blood glucose meter designed to measure blood sugar levels. It transmits the measured blood sugar levels to a mySugr app, installed on the user's smartphone, using Bluetooth wireless technology ("digital media communication protocol").</p> <div data-bbox="443 711 1606 1154">  </div> <p>Source: https://www.accu-chek.com/products/meters/guide</p>

Exhibit 3 to the Complaint.

5 mySugr Connectivity

Take the stress out of diabetes management by pairing your Accu-Chek blood glucose meter with the mySugr app via Bluetooth®. This will automatically transfer your values so you can analyze your blood sugar in an easy-to-use dashboard right in the palm of your hand. [Learn More](#)

Bluetooth Wireless Technology – The meter uses *Bluetooth®* low energy wireless technology to communicate and transfer information. Bluetooth wireless technology is a form of radio frequency (RF) technology that operates in the unlicensed industrial, scientific, and medical band at 2.4 to 2.485 GHz. The RF channel utilized for communication between the meter and other devices, such as a smartphone, is not an open channel. The meter can only communicate with the device that

1. utilizes Bluetooth low energy technology,
2. it is paired with, and
3. has an application that can accept the meter data.

Exhibit 3 to the Complaint.

CONNECT THE ACCU-CHEK GUIDE METER TO THE MYSUGR APP

1

Using your smartphone, **download the mySugr app** from the App Store or Google Play and **create your mySugr account**.

2

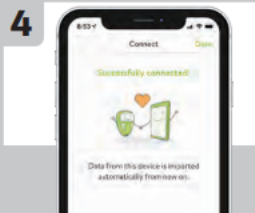

Turn on **Bluetooth®** wireless technology on your smartphone (if it's not on already).

3

Open the mySugr app, and select **Connections** on the menu. Select **Accu-Chek Guide**, and then **Connect now**. Follow the step-by-step directions for pairing.

4

After your meter is successfully connected to the mySugr app, **data from your device is imported** automatically. Now you can easily keep your diabetes data under control!

[1.3] at least one
media node
disposable
within said
wireless

Company makes, uses, sells and/or offers to sell at least one media node disposable within said wireless range, wherein said at least one media node is detectable by said at least one media terminal.

This element is infringed literally, or in the alternative, under the doctrine of equivalents.

Exhibit 3 to the Complaint.

range, wherein said at least one media node is detectable by said at least one media terminal,

For example, the Accu-Chek Guide ("media node") employs the Bluetooth network ("interactive computer network") to pair with the mySugr app which is installed on the user's smartphone. The smartphone, on which the mySugr app is installed, detects the Accu-Chek Guides which are within its Bluetooth range.

1 Personalized logging screen

Organize the app the way it suits you better. Remove or add fields depending on your therapy needs.

2 mySugr Analytics

The analytics dashboard in the mySugr app provides you with an overview of your recorded blood sugars to help you identify patterns, allowing you to identify areas where your management could be optimized.

3 Data Reports & Sharing

mySugr Reports compile your data for easy printing or digital sharing. You can access and download your data anytime, anywhere and feel free to share your reports with your family, caregivers, and healthcare team for accountability and support.

For example, the mySugr app, installed on the smartphone, initiates Bluetooth pairing to establish the communication channel with the Accu-Chek Guide.

How can I transfer Accu-Chek meter data to mySugr? ^

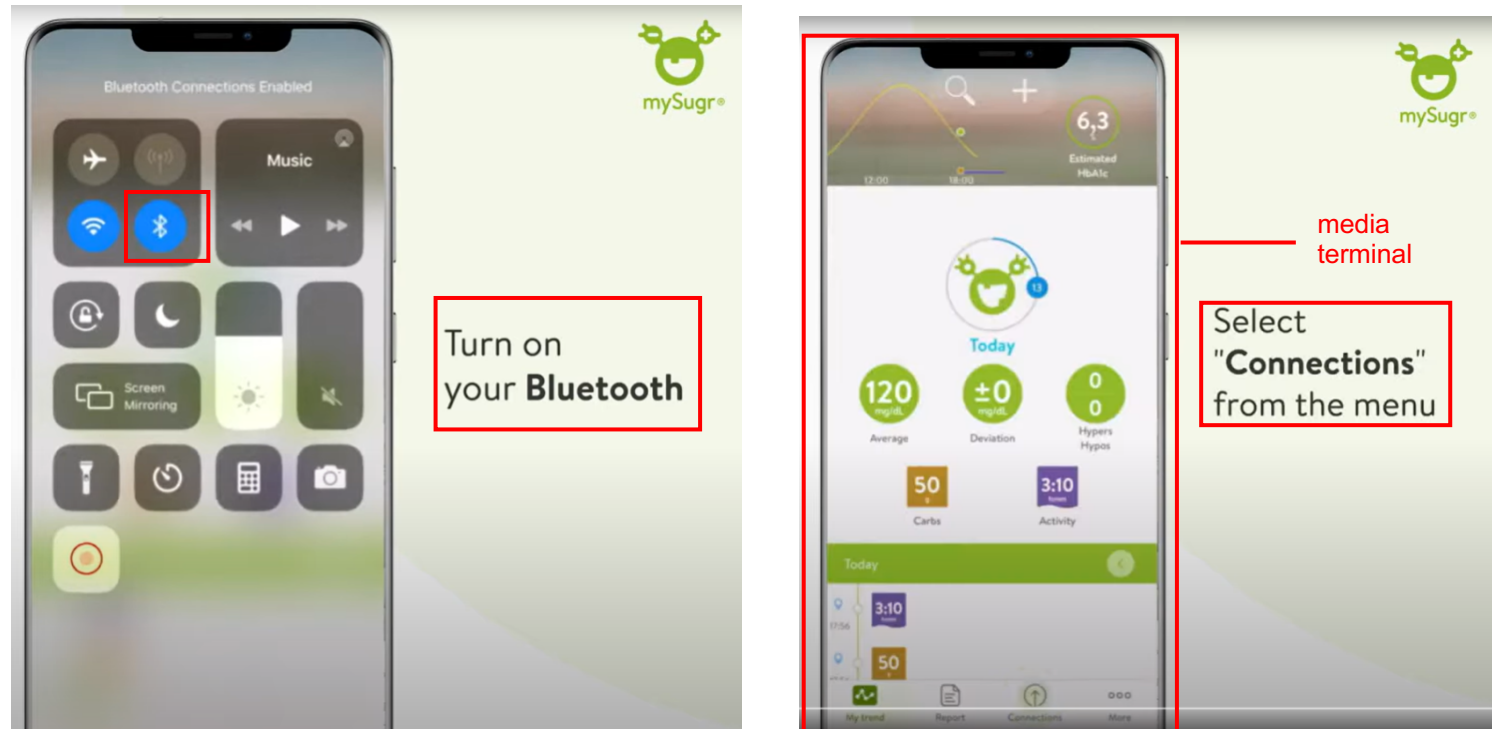

Pairing your Accu-Chek meter to the mySugr app allows you to automatically log your blood sugar readings into the app, saving you tons of time.

Follow the steps below to pair your Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect meter to the mySugr app:

1. If you are using an Apple device, make sure Bluetooth® is turned on.
- a. Bluetooth should turn on automatically for Android users at the beginning of the pairing process.
2. Ensure Location Services are turned on for the mySugr app during the pairing process. (You can turn it back off once you're done. Settings > Apps > mySugr > Location Services.)
3. Open the mySugr app and go to the "Connections" tab in the bar menu located at the bottom of the screen.
4. Select your meter – Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect – and follow the steps on the screen to activate it.
5. You'll then receive a message that pairing was successful, meaning your meter is now connected to your mobile device.
6. You can return to the mySugr home screen by tapping on "My trend" in the tab menu located at the bottom of the screen

Connecting your devices & services

At mySugr, we're of the humble opinion that paper is for origami, not for logbooks.

That's why when you connect your diabetes device with mySugr, your connected meter will automatically log your blood sugar readings into the app. No need to bother flicking through pages anymore! Everything's available in a few taps in the app.

Connection Brings Freedom!

- Automatic data importing saves tons of time
- Connect your blood glucose meter and avoid manual logging errors
- Connect your Google Fit® or Apple Health® tracker to easily track fitness data
- Enjoy extra time in your days thanks to the Pairing feature

CONNECT THE ACCU-CHEK GUIDE METER TO THE MYSUGR APP

1

Download on the
App Store

GET IT ON
Google Play

Using your smartphone,
download the mySugr app
from the App Store or Google
Play and **create your mySugr
account.**

2

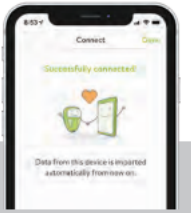

Turn on **Bluetooth®** wireless
technology on your smartphone
(if it's not on already).

3

Open the mySugr app, and
select **Connections** on the
menu. Select **Accu-Chek
Guide**, and then **Connect now**.
Follow the step-by-step
directions for pairing.

4

After your meter is successfully
connected to the mySugr app,
**data from your device is
imported** automatically. Now
you can easily keep your
diabetes data under control!

CONNECT THE ACCU-CHEK GUIDE METER TO THE MYSUGR APP

1

Download on the App Store | GET IT ON Google Play

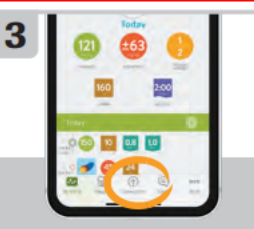

Using your smartphone, **download the mySugr app** from the App Store or Google Play and **create your mySugr account**.

2

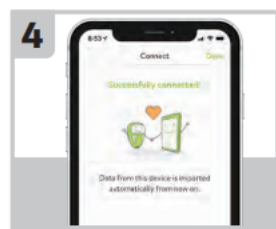

Turn on **Bluetooth®** wireless technology on your smartphone (if it's not on already).

3

Open the mySugr app, and select **Connections** on the menu. Select **Accu-Chek Guide**, and then **Connect now**. Follow the step-by-step directions for pairing.

4

After your meter is successfully connected to the mySugr app, **data from your device is imported** automatically. Now you can easily keep your diabetes data under control!

How can I transfer Accu-Chek meter data to mySugr? ^

Pairing your Accu-Chek meter to the mySugr app allows you to automatically log your blood sugar readings into the app, saving you tons of time.

Follow the steps below to pair your Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect meter to the mySugr app:

1. If you are using an Apple device, make sure Bluetooth® is turned on.
 - a. Bluetooth should turn on automatically for Android users at the beginning of the pairing process.
2. Ensure Location Services are turned on for the mySugr app during the pairing process. (You can turn it back off once you're done. Settings > Apps > mySugr > Location Services.)
3. Open the mySugr app and go to the "Connections" tab in the bar menu located at the bottom of the screen.
4. Select your meter – Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect – and follow the steps on the screen to activate it.
5. You'll then receive a message that pairing was successful, meaning your meter is now connected to your mobile device.
6. You can return to the mySugr home screen by tapping on "My trend" in the tab menu located at the bottom of the screen

CONNECT THE ACCU-CHEK GUIDE METER TO THE MYSUGR APP

1

Using your smartphone, **download the mySugr app** from the App Store or Google Play and **create your mySugr account**.

2

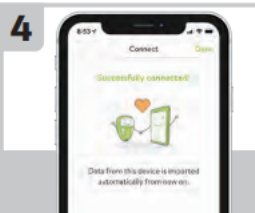

Turn on **Bluetooth®** wireless technology on your smartphone (if it's not on already).

3

Open the mySugr app, and select **Connections** on the menu. Select **Accu-Chek Guide**, and then **Connect now**. Follow the step-by-step directions for pairing.

4

After your meter is successfully connected to the mySugr app, **data from your device is imported** automatically. Now you can easily keep your diabetes data under control!

How can I transfer Accu-Chek meter data to mySugr? ^

Pairing your Accu-Chek meter to the mySugr app allows you to automatically log your blood sugar readings into the app, saving you tons of time.

Follow the steps below to pair your Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect meter to the mySugr app:

1. If you are using an Apple device, make sure Bluetooth® is turned on.
 - a. Bluetooth should turn on automatically for Android users at the beginning of the pairing process.
2. Ensure Location Services are turned on for the mySugr app during the pairing process. (You can turn it back off once you're done. Settings > Apps > mySugr > Location Services.)
3. Open the mySugr app and go to the "Connections" tab in the bar menu located at the bottom of the screen.
4. Select your meter – Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect – and follow the steps on the screen to activate it.
5. You'll then receive a message that pairing was successful, meaning your meter is now connected to your mobile device.
6. You can return to the mySugr home screen by tapping on "My trend" in the tab menu located at the bottom of the screen

CONNECT THE ACCU-CHEK GUIDE METER TO THE MYSUGR APP

1

Using your smartphone, **download the mySugr app** from the App Store or Google Play and **create your mySugr account**.

2

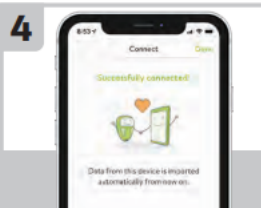

Turn on **Bluetooth®** wireless technology on your smartphone (if it's not on already).

3

Open the mySugr app, and select **Connections** on the menu. Select **Accu-Chek Guide**, and then **Connect now**. Follow the step-by-step directions for pairing.

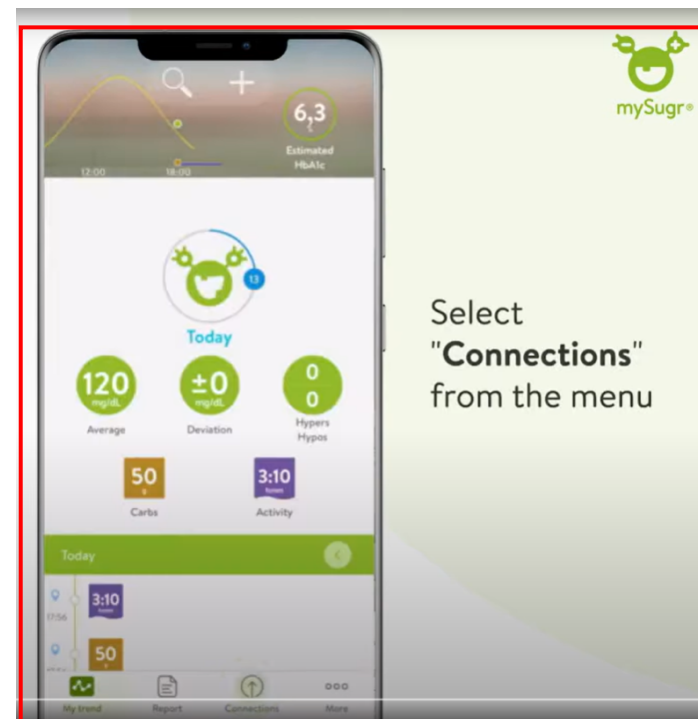

4

After your meter is successfully connected to the mySugr app, **data from your device is imported** automatically. Now you can easily keep your diabetes data under control!

[23.6] said communication link being initiated by said at least one media terminal and structured

Company makes, uses, sells and/or offers to sell said communication link being initiated by said at least one media terminal and structured to bypass at least one media terminal security measure.

This element is infringed literally, or in the alternative, under the doctrine of equivalents.

For example, the mySugr app, installed on the smartphone, initiates Bluetooth pairing to establish the communication channel with the Accu-Chek Guide. The Accu-Chek Guide meter and the mySugr app do not require users to input a

Exhibit 3 to the Complaint.

to bypass at least one media terminal security measure,	<p>PIN (“security measure”) every time they communicate. Instead, the PIN input is necessary during the initial pairing process, and thereafter, the devices automatically exchange data without requiring users to re-enter the PIN (“bypass at least one media terminal security measure”). Therefore, upon information and belief, the Bluetooth channel created between Accu-Chek Guide meter and mySugr app bypasses the security measure.</p> <div><p>5 mySugr Connectivity</p><p>Take the stress out of diabetes management by <u>pairing your Accu-Chek blood glucose meter with the mySugr app via Bluetooth®</u>. Bluetooth Wireless Technology – The meter uses *Bluetooth*® low energy wireless technology to communicate and transfer information. Bluetooth wireless technology is a form of radio frequency (RF) technology that operates in the unlicensed industrial, scientific, and medical band at 2.4 to 2.485 GHz. The RF channel utilized for communication between the meter and other devices, such as a smartphone, is not an open channel. The meter can only communicate with the device that

1. utilizes Bluetooth low energy technology,
2. it is paired with, and
3. has an application that can accept the meter data.

How can I transfer Accu-Chek meter data to mySugr?

Pairing your Accu-Chek meter to the mySugr app allows you to automatically log your blood sugar readings into the app, saving you tons of time.

Follow the steps below to pair your Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect meter to the mySugr app:

1. If you are using an Apple device, make sure Bluetooth® is turned on.
 - a. Bluetooth should turn on automatically for Android users at the beginning of the pairing process.
2. Ensure Location Services are turned on for the mySugr app during the pairing process. (You can turn it back off once you're done. Settings > Apps > mySugr > Location Services.)
3. Open the mySugr app and go to the "Connections" tab in the bar menu located at the bottom of the screen.
4. Select your meter – Accu-Chek Guide Me, Accu-Chek Guide or Accu-Chek Aviva Connect – and follow the steps on the screen to activate it.
5. You'll then receive a message that pairing was successful, meaning your meter is now connected to your mobile device.
6. You can return to the mySugr home screen by tapping on "My trend" in the tab menu located at the bottom of the screen
